

KING'S

Organizational and
Human Resources

The School of MEM

King's proudly announces our newly-formed "School of Management, Economics, and Mathematics" (the School of MEM for short). This rebranding allows us to maintain the independence of our three departments while highlighting the professional orientation of our programs. We provide students with a leading undergraduate experience through our two programs: Bachelor of Arts in Economics and Bachelor of Management and Organizational Studies – both with several program streams.

School of Management, Economics, and Mathematics

A Place to Be. A Place to Become.

School of Management,
Economics, and Mathematics

The Program

The Organizational and Human Resources (OHR) stream of King's BMOS degree focuses on maximizing organizational performance through effective employee selection and training, performance appraisals and rewards systems, as well as leadership development and diversity management. Three major factors determine the economic success of a firm: land, labour, and capital. Therefore, being able to manage human resources (labour) is at the core of any successful business.

Beyond the Classroom

Students enrolled in the OHR program can pursue a Professional Designation by taking accredited courses during their program. For more details go to www.hrpa.ca.

"My undergraduate degree in Human Resources and Psychology has provided me with a solid foundation for entering the business world. Every day, I can see the theoretical and practical knowledge I acquired being applied. This just shows this program really does lay the foundation for stepping into the real world." - Manali Mazumdar, Double Major in Human Resources and Psychology
