

PSYCHOLOGY

Honours Specialization in
Psychology

Minor in Psychology

Major in Psychology

Why Choose the Psychology Program?

Explore the mysteries of the human mind. In the King's Psychology program, you'll study the psychological, biological, and social bases of how we think, feel, and behave, and use this knowledge to understand and solve problems in the real world. You'll gain insight into yourself and others, and develop a deeper insight into why we behave the way we do. You can investigate a wide range of areas: addictions, child development, counselling, consciousness, creativity, diversity, education, law, thinking and perceiving, mental health, personality, psychological disorders, religion, sexuality, social issues, work and organizations. Your education in Psychology can take you many places – into health, education, law, business, science or research, where understanding human behaviour makes a real difference.

PROGRAM HIGHLIGHTS

1. Small Class Sizes:

Experience small class sizes that ensure personalized attention and a supportive learning environment, where you can thrive academically and personally.

2. Hands-on Experience:

Engage in hands-on research and practical experiences through lab courses and independent projects that bring your learning to life.

3. Expert Faculty:

Learn from experienced faculty members who are not just dedicated educators but also active researchers, eager to share their insights and guidance.

4. Well-rounded curriculum:

Explore a well-rounded curriculum that combines both theoretical knowledge and practical applications, preparing you for a dynamic future in psychology.

5. Explore Advanced Learning Resources

Utilize well-equipped facilities and resources, including psychological testing materials and research labs, designed to enhance your learning and research experience.

Choosing the Psychology program at King's was the best decision I made for my academic journey. The faculty are incredibly supportive, and the hands-on research opportunities have been invaluable. I feel well-prepared for my future career and further studies."

Justin Mulder '22,
Honours Specialization in Psychology
